

PACK ALL KINDS OF PRODUCTS WITH FABBRI GROUP!

3-6 May 2022, Fiera Milano, Stand no. B05, Hall 5 - With a new stand design dedicated to Sustainability and Innovation, Fabbri Group will present at Ipack-Ima 2022 top-quality best-performing complete packaging systems for all kinds of food applications, such as for red and white meat, fish and seafood, alternative proteins, fruit and vegetables, cheese, gastronomy, sauces, pasta, confectionery, etc.

If you are looking for:

→ ***The perfect combination of both traditional & biodegradable materials with top packaging performance:***

Test our “Hybrid” wrapping machines: unique in the world, they can use traditional, biobased, and compostable materials with extreme flexibility and no additional costs or downtime.

For you on show: **AUTOMAC ULTRA** - High productivity wrapping machine (75 ppm)

NATURE FRESH - The first stretch film worldwide for automatic packaging with domestic & industrial compostability certification (EN 13432). Nature Fresh has been granted 6 national and international Awards as “Best Packaging Innovation of the year” and has already wrapped millions of products on the market, in Italy and abroad.

→ ***MAP & Skin automatic, semi-automatic and manual packaging solutions for retailers and industry:***

Our **CAVECO** range of automatic, semi-automatic and manual tray-sealers punctually responds to all request coming from the food sector, from small producers to large-scale retail trade up to industrial packagers.

For you on show: **GAMMA** - The in-line tray-sealer for large productions, with over 200 optional integrations to create your complete packaging line

MAGIC 2.0 - The innovative compact tray-sealer that automatically packs trays and skinpads of different shapes and heights without changeovers

→ ***Different types of film to suit all packaging demands:***

Choose among the many Fabbri **TRADITIONAL, BIOBASED, COMPOSTABLE STRETCH AND BARRIER FILMS**, available in plain or printed form according to the different applications.
